Notice Period: 60 Days

PROFESSIONAL SUMMARY

Results-driven US Mortgage Operations professional with 7+ years of end-to-end experience across loan origination, closing, and quality management. Proven leader managing 20 processors with 100% SLA adherence. Specialized in AI-driven process improvement and no-code tool development — building automation solutions and web-based applications using AI platforms (Copilot, ChatGPT, Google App Script) without traditional coding.

CORE COMPETENCIES

|                                                |                                                                                |
|------------------------------------------------|--------------------------------------------------------------------------------|
| Mortgage Domain: Conventional, FHA & VA Loans  | People Management: Team of 20, SLA & KPI Tracking                              |
| Loan Operations: Origination, Setup & Closing  | AI & Automation: Prompt Engineering, Workflow Design, No-code Tool Development |
| Quality Management: SME, QA Audits & Reporting |                                                                                |

PROFESSIONAL EXPERIENCE

Subject Matter Expert & Team Lead — Cognizant

2018 – Present

- Resolved quality queries across 50+ daily loan files with zero backlog.
- Designed AI prompt-based logic to auto-flag errors, reducing QA review time by ~40%.
- Built AI-assisted checklists replicating SME-level review for all processors.
- Managed a 20-member team, ensuring SLA adherence and productivity tracking.
- Developed Process Improvement Plans (PIPs), reducing error rates by ~15%.

Loan Processor — Flatworld Mortgage Processing Pvt Ltd

2015 – 2018

- Validated eligibility for FHA/VA loans per RESPA/TILA guidelines.
- Reviewed loan applications with <2% error rate.
- Prepared Closing Disclosure documents with 99%+ accuracy.
- Indexed loan disclosures ensuring audit-ready workflows.

KEY ACHIEVEMENTS

- Built AI-powered quality control tools without coding.
- Designed and deployed a web-based OCR tool (Copilot + Google App Script) to extract text from screenshots, enable keyword search, and track usage.
- Automated reporting workflows, reducing weekly documentation time by ~40%.
- Promoted to SME & Team Lead within 3 years.

AI & AUTOMATION SKILLS

|                            |                                         |
|----------------------------|-----------------------------------------|
| Quality Control Automation | AI Platforms (Copilot, ChatGPT, Claude) |
| Prompt Engineering         | No-code AI Tool Development             |
| Workflow Automation        | Web-based OCR Tool Creation             |

TECHNICAL SKILLS

|                                                         |                                                                        |
|---------------------------------------------------------|------------------------------------------------------------------------|
| <b>MS Excel:</b> Macros, Pivot Tables, Dashboards       | <b>Mortgage Tools:</b> Loan origination systems, disclosure management |
| <b>MS Word &amp; PowerPoint:</b> Reports, Presentations | <b>Reporting:</b> SLA, productivity & quality dashboards               |
| <b>AI Tools:</b> Copilot, ChatGPT, Claude               | <b>No-code Development:</b> Google App Script, OCR automation          |
